

Introduction

With the coming of the alcohol-license for the UT the organisation of the drink localities should change in some regard. As the OS will be the responsible organisation on the license there should be some oversight to ensure all localities comply with the rules set in the license. This oversight will be done by the OS, with a contact person per drink locality. Also a complete document of regulations should be made combining the already existing alcohol policy of the UT and the new set of rules coming with the license.

Comparable to the OOC, ICOS and EB-overleg, the contacts might need to meet every once in a while. When needed, the OS board contact can call for a meeting between the different locality contacts.

The committee

The committee will contain 1 representative of all localities:

- Diepzat
- Beneden peil
- Abscint
- MBasement
- TAP
- The new location in the Technohal

Responsibilities

- Producing and updating document of regulations
This will mostly be performed during the coming months, as the current alcoholcovenant needs to be checked and changed to match the regulations set by the local government council.
- Checking if regulations are being met by localities
- Setting up and updating list of bar volunteers
