LoopbaanOriëntatieCommissie, Redactie The CaT (magazine), Eerstejaarscommissie.

Re: application supervisory board SU

December 19, 2018

Dear OS board and Marijn,

Hereby my motivation letter for the position in the supervisory board of the Student Union as representative on behalf of the study associations. In this letter, I will shortly talk about myself, why I would like to fulfil this position and why I would be suitable for this function.

My name is Bart van Eindhoven. In 2015 I moved to Enschede to start my bachelor Chemical Science and Engineering. Hopefully, I will finish this bachelor in a year to continue my study with the master Chemical Engineering. Last study year, I accomplished a board year as treasurer of study association C.T.S.G. Alembic, where I am still active in committees. Next to this I am an employee of Pre-u as coordinator Leerlingenlab and as supervisor for multiple classes. Furthermore I am an active water polo player for Z.P.V. Piranha.

During my board year, I discovered I liked my treasurer duties, but liked the execution of our policy plan even more. I loved all the discussions with members of with the rest of the board and I always tried to look at all the benefits and disadvantages of decisions, from all points of view. All these discussions created a more complete view about the association and our contact with the university. However, this is just a small part of the whole university. Even taking along everything I know about the university because of my activism for Pre-u and Piranha, there is a lot more to learn about a big and interesting organisation as the Student Union.

Connected to the fact I love discussion, I want to listen to other opinions to create a complete overview of a situation. However, I absolutely does not have problems to make one clear opinion about the situation. Combined with the fact I love to review pieces on content (grammar is not my quality), I think this position in the supervisory board could be suitable for me.

Your sincerely,

Bart van Eindhoven
