*Proposal Activism Grants distribution - Category 4  
AC committee*

---

When drafting the order for category 4, the AC tried to stay as close to the grants model as possible. This posed some problems, as a lot of grants for category 4 were requested for lustra. Lustra are not mentioned in the model once. Therefore, the AC looked at the activities of each lustrum and compared these to the three points named in the grants model.

When ranking the activities requested in category 4, the AC first divided the activities among the points mentioned in the grants model. Within these categories a ranking was then made based mostly on the amount of work a committee had to do to organize the activity. Activities for which insufficient proof was provided, at first were put at the bottom of the list and additional information was requested for some of them. Activities that did not fall under one of the three points mentioned in the model were rejected. Idefiks was put at the top of the list, because the board can't request grants in another way.

A special mention is the BMS symposium. Grants for the BMS symposium were requested by one association only. The AC is of the opinion that if the BMS symposium would get grants, the grants should come to the benefit of all members of the committee and not just the members of the association that requested the grant.

The proposed division can be found below. Grants will be divided over these activities from top to bottom, granting one board three grants, two activities two grants and afterwards in the ranking one grant. The amount of one grant is still subject to change since the model will be adapted to the new FOBOS system.

### Proposed order of Activism Grants category 4, 2019

<b>Associations</b>	<b>Activity</b>	<b>Max. Grants</b>
Idefix	Board	3
Alembic	ONCS	2

Arago	PION	2
Sirius	Provincial State Debate	1
Inter-Actief	Pandora	1
Concept	Betonbrouwers	1
Communiqué	BMS Symposium	1
Sirius	Career days	1
Communiqué	Lustrum	1
Paradoks	Barboubbazen	1
Atlantis	Benefit Dinner	1
Daedalus	Webcie	1 *
Proto	iOS application	1

\*Here we are still waiting for a response to get more input
